right double quotes: ”

html attributes

Attributes provide additional information about elements, they are always specified in the start tag. Attributes usually come in name/value pairs like: name="value"

[visit for html documentation](#)

The required **alt** attribute for the **img** tag specifies an alternate text for an image, if the image for some reason cannot be displayed. This can be due to slow connection, or an error in the src attribute, or if the user uses a screen reader.
